

3 Lakes Improvement District

TLID

Minutes from meeting of:

October 2, 2023

Barb A	Present
Bob S	Present
Diane S	Present
Doug S	Present
Nancy H	Present
Stacy S	Present
Todd L	Present
Scott R	Absent

Guests: Tom Hahne, Shelly Alger-Peyton

Call to Order at: 6:00 PM

Adoption of Agenda: Motion by Stacy 2nd by Bob pass
Changes - none

Approval of Minutes: Motion by Diane 2nd by Todd pass
Changes - none

Financial Report:

Bills paid: Water logger \$10.00

Account Balance: \$67,431.10

Motion by Nancy 2nd by Stacy pass

Officer Reports:

Chair: working on yearend report

Vice-Chair: Stacy is hoping a board member would be willing to be our rep at the Healthy Lakes Meetings. Bob volunteered to start attending Healthy Lakes. Doug will be his backup.

Secretary: Nancy reported that the county has refunded the three members who were being overcharged. The county also approved the 2024 TLID assessment.

Treasurer: nothing

Advisor: absent

Old Business:

Watershed Plan 2024: There is a meeting scheduled for next week.

James Johnson Update: James completed the point intercept survey for Rush, will send results soon.

Alum Feasibility Study: Scott was absent but Shelly Alger-Peyton reported that the carp survey will take place next spring. We should be receiving the findings this winter on the alum feasibility study data that has been collected this year (minus the carp population study). Shelly stated she would like to ask Steve McComas, the lake detective, back again in the spring to help us better understand our findings.

Purple Loosestrife update: Purple Loosestrife has been pulled in the bayou for this year. Stacy will work on a summary of our efforts to complete our grant process. Barb asked for someone to take over this project. Bob said he would be willing to spearhead this.

New Business:

2024 TLID Projects: Stacy mentioned that because we have seven projects for next year and that there are seven board members that maybe we could each pick one and be the spokesperson for that project. We all thought that was a great idea. Here are the assignments:

Curly Leaf Pondweed - Barb Aaberg

Water Level Stabilization - Stacy Strang

Water Logger Monitoring - Diane Stangler

Algae Reduction (Alum Treatment) - Nancy Hahne

Boat Access Monitoring - Todd Lorsung

Purple Loosestrife - Bob Sass

Investigate Algae Removal (Skimmer Boats) - Doug Solem

2024 TLID Goal: Stacy went over the goals from 2023. We should all look at these and be ready to review and revised next month.

Other: Bob mentioned he read through the Wenck report and was interested to learn more. He was wondering what we've done with this information and rather there's some things in that report that may still be useful as we move forward working on water level stabilization and water clarity. He was specifically interested in the berms in the bayou. We will look at this as we move forward.

We adjourned at 6:55 PM
